WORK EXPERIENCE

President – “EVOROBS” (Robotics Association)

2022 - PRESENT

- Founded and currently lead the robotics association “EVOROBS”.

R&D Internship – Robotics Research Laboratory, “South China University of Technologie ” (China)

Feb - Sep 2026

- Worked on humanoid / wheeled robotics : perception, SLAM, control and real-world testing.
- Developed human-robot interaction and teleoperation tasks using hand tracking and smart glove-based control.
- Implemented a new control policy on the Unitree G1 using reinforcement learning for autonomous locomotion in the Beijing humanoid robot marathon (real-world testing).

R&D Internship – Robotics Research Laboratory of “Kalysta” (start-up)

Jul - Sep 2025

- Collected and processed boxing motion data with motion capture (Xsens).
- Reconstructed 3D trajectories in MATLAB and applied DTW, GMM, GMR to generate generalized motions for humanoid robot punching.

Internship as a Senior Technician - “CMQ industrie du futur IDF”

Apr - Jun 2023

- Maintenance and optimization of an automated production line (Industry 4.0)
- Worked with Mobile, Cooperative and Industrial Robots

PERSONAL PROJECTS

Machine vision & mobile robot control (CoppeliaSim + ROS2)

- Real-time human body detection using MediaPipe and OpenPose
- Control a mobile robot in CoppeliaSim through ROS2 API

Self-balancing robot (inverted pendulum on two wheels)

- Designed and 3D modeled the entire robot structure
- Developed the full electronic system
- Implemented various control strategies : PID, MRAC, MIAC, and ADRC.

Electromagnetic levitation module

EDUCATION

M.Sc. in Mechatronics, Machine Vision and Artificial Intelligence | Paris-Saclay University (France)

2025 - 2026

M.Sc. in Smart Aerospace and Autonomous Systems | Polytechnic University of Poznan (Poland)

2025 - 2025

- Automatic Control and Robotics - Exchange student (GPA : 3.7/4.0)

M.Sc. in Electronics, Electrical Energy, Automatisations | Paris-Saclay University (France)

2024 - 2025

B.Sc. in Engineering Sciences (with honors)

| Paris-Saclay University (France)

2021 - 2024

- Electronics, Automation, and Information Processing

BIA – Aeronautical Initiation Certificate

2021

PROFESSIONAL SKILLS

- | | | | | |
|------------|--------------|----------|---------------------------------|--------------------------------|
| • MATLAB | • PyTorch | • C/C++ | • CoppeliaSim / V-REP | • Solidworks/ fusion360/ CATIA |
| • Simulink | • TensorFlow | • Python | • Mujoco/ Isaac/ Gazebo/ SAPIEN | • OrCAD PSpice |
| • ROS2 | • SLAM | • JAVA | • Deep Learning / RL | • OpenCV / YOLO |

ACCOMPLISHMENTS

- Represented France at the 2026 Beijing Humanoid Robot Half-Marathon
- Participation in the 2024 French Robotics Cup
- Finalist in the 2024 University Robotics Competition
- Finalist in the “My Job in 180 Seconds” Competition

LANGUAGES

- | | |
|-----------------------|-----------------------|
| • French (Native) | • Mandarin (HSK3) |
| • English (Fluent C1) | • Japanese (Beginner) |
| • Spanish (B2) | • Korean (Beginner) |
